

Workflow planning worksheet

Describe one workflow before discussing automation. Fill in the blank sheet; the second page shows a completed sample.

Workflow name and owner

Trigger — what starts the work?

Inputs — which approved sources does it use?

Tasks AI may prepare (and what it must not do)

Human decisions — who approves, edits or returns?

Exceptions — what goes straight to a person?

Output — what is delivered, in what format?

Record — what should be kept for next time?

Completed sample — product launch content SAMPLE / 示例

Workflow name and owner	Launch content · Brand manager
Trigger — what starts the work?	Launch brief approved
Inputs — which approved sources does it use?	Approved facts list (capacity, material, colours); no price supplied
Tasks AI may prepare (and what it must not do)	Draft captions and invitation copy from the facts. Must not add claims, prices or publish.
Human decisions — who approves, edits or returns?	Brand manager approves, edits or returns each item; edits reset approval
Exceptions — what goes straight to a person?	Any new claim; colour names not in the list
Output — what is delivered, in what format?	Reviewed caption + invitation as a labelled text export
Record — what should be kept for next time?	Sources used, reviewer notes, returned items and why

Human decision checklist

- ☐ Every publishable item has a named approver
- ☐ Editing an approved item sends it back for review
- ☐ Sensitive or new claims always go to a person
- ☐ Sending, publishing and spending need explicit permission
